

**PEST
WIZARD**Contains 5 yellow
*MessyLess*3¾ x 5 inch double sided
Adhesive™ traps + 5 hangers

THE TRAPS PROFESSIONALS PREFER

HOW THE TRAP WORKS: Pest Wizard® spectrographically accurate yellow sticky traps are visually attractive to many species of insects belonging to the general pest families listed on the front of this package. When these insects land on the trap they can no longer mate, lay eggs, or damage the plants in your yard or garden. As a result, fewer larvae offspring are produced (caterpillars, maggots, nymphs) which may make it possible to reduce or eliminate insecticide use.

DEPLOYMENT: Hang traps from a tree branch, a garden stake placed between roses or by flowers, a line strung above vegetable rows, on ornamental shrubs, or a fence or trellis.

- NON-TOXIC ADHESIVE
- **IF LURE IS INGESTED**, seek medical attention.
- **NOT A TOY:** Keep *MessyLess Adhesive™* Trap out of reach of children.
- **KEEP *Messyless Adhesive™* TRAP AWAY FROM EYES AND HAIR.** Adhesive could stick to eye lashes and hair and pull the lashes or hair out.
- **CLEAN UP:** Wash with soap and water.
- **DISPOSE OF PLASTIC PACKAGING IN A PROPER TRASH RECEPTACLE. DO NOT RECYCLE.**
- **RESULTS MAY VARY** due to seasonal changes, insect pest population variations, natural predator populations, correct trap installation, proper lure storage and weather extremes, disruption, damage and/or contamination due to chemical sprays, pets, children, sprinklers, or other unforeseeable events.
