

Broad Spectrum Bactericide and Fungicide Compound

Your solution for fungal & bacterial borne diseases.

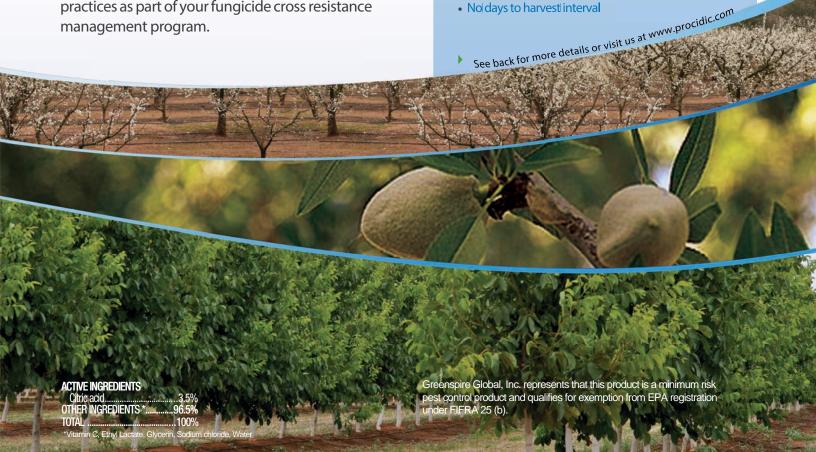

bactericide and fungicide Procidic formulated to protect crops during all stages of growth. Procidic's advanced formula works to eliminate pathogenic bacteria and fungi on contact and is rapidly absorbed into the plant.

Working systemically, Procidic moves toward the apex of the plant to inhibit the future growth of bacteria and fungi. Procidic may be applied in regular foliar spray programs or in tank mixes. Always apply according to the directions on the label.

Procidic is the IDEAL solution for rotation practices as part of your fungicide cross resistance management program.

Prevents and Controls Damage caused by:

- Monilinia sp
- Botrytis cinerea
- Sclerotinia sp
- Colletotrichum sp
- Alternaria sp
- · Agrobacterium sp
- Phythopthora sp
- Verticillium sp
- Pseudomonas sp
- Bactericide and fungicide dual action mode
- Organically certifiable
- Works systemically
- No re-entry waiting period required
- Works on contact & through residual action
- No days to harvest interval

Broad Spectrum Bactericide and Fungicide Compound Recommended Usage Rates & Instructions

- 1. Procidic is best used as a preventative.
- 2. Apply Procidic in regularly scheduled spray program.
- 3. Procidic requires quality water free of contaminants and organic matter, a pH of 5.5-6.0 and a low salt concentration.
- 4. No re-entry waiting period is required.
- 5. Use higher dosage of Procidic during periods of high humidity.
- 6. Refrain from unnecessary contact with crops after treatment.
- 7. Do not mix with dicofol, methomyl and cyhexatin.
- 8. Do not mix with salt-based or high-alkali reaction products.
- 9. Procidic is absorbed systemically through the stem, leaves and root system. When disease pressure is present Procidic applications must reach live, green leaves.

Use Rates

Almond & Walnut

Those caused by Monilinia sp, Botrytis cinerea, Sclerotinia sp, Colletotrichum sp, Alternaria sp, Pseudomonas sp, Disease

Agrobacterium sp, Phythopthora sp, Verticillium sp.

Dose Preventative programs 5-10fl oz/Acre, Curative programs 30 fl oz/Acre

Use Rate For maintenance spray every 25-30 days. On infected groves spray every 15 days.

Apple

Disease Apple Scab (Venturia inaequalis)

7-9 fl oz/100 gal water + 8-12 lbs/acre sulfur dr (60% sulfur) Dose

Use Rate Spray tank mix with Procidic + 8-12 lbs/acre sulfur df (60% sulfur) or its equivalent. Preventative spray must be mixed with the low rate

Procidic and sprayed every 7 days. Suggested water volume 80-107 gal/acre. Upon first discovery of disease after emergence use the high rate of Procidic within 24 hours. Repeat spray every 5-7 days until control is attained. Suggested water volume is 80-107 gal/acre.

Citrus

Disease Citrus Greening, Citrus Canker

Preventative programs 5-10fl oz/Acre, Curative programs 30 fl oz/Acre Dose

Use Rate For maintenance spray every 25-30 days. On infected groves spray every 15 days.

Cherry

Disease **Gummosis, Powdery Mildew, Downy Mildew**

Preventative programs 5-10fl oz/Acre, Curative programs 30 fl oz/Acre Dose

Use Rate For maintenance spray every 25-30 days. On infected groves spray every 15 days.

PEACHES, NECTARINES, APRICOTS

Disease Monilina Laxa, Phythophtora sp, Botrytis sp

Dose Preventative programs 10fl oz/Acre, Curative programs 25-30 fl oz/Acre

Use Rate Preventative spray application includes sprayings prior to wet events and/or when expecting favorable conditions for disease

development. Upon first discovery of disease curative sprays are to be done every 15 days.
