ARCHIPELAGO

BAT GUANO

LLC.

Derived from bat guano.

Purpose: Archipelago Bat Guano Phosphate Fertilizer is 100% natural and organic. The guano is ground to a fine grain size for even application but is otherwise untreated. This natural organic fertilizer can be directly blended with compost or soil to promote vigorous roots, abundant blooms and increase fruiting. The fertilizer can also be prepared as a liquid for foliar applications.

Application Rate (Gardens, Farms and Vineyards):

Application rates vary for different plants and soil conditions, but 4 pounds of guano per 100 square feet per year is recommended as a default rate.

Application Rate (Container Plants): 1-2 tbsp of guano is recommended for each 4 gallons of soil. Apply every 6 weeks.
