Eliminates Blue-Green Algae and Keeps Water Clear.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMAN AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes irreversible eye damage. Do not get in eyes, on skin or on clothing. Wear protective eyewear (goggles, face shield or shielded safety glasses). Harmful if swallowed, inhaled or absorbed through skin. Avoid breathing dust. Wash thoroughly with soap and water immediately after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse. When prolonged or repeated contact may occur, use chemically resistant gloves and full body clothing.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to birds. Do not contaminate water when cleaning equipment or disposing of equipment wash water or rinsate. GreenClean Granular is NOT intended for use in drinking water.

PHYSICAL AND CHEMICAL HAZARDS

Strong oxidizing agent. Corrosive. Mix only with water in accordance with label instructions. Do not bring in contact with other pesticides, cleaners or oxidative agents.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. During amphibian breeding seasons, do not apply near shallow water body margins.

Corrosive. Causes irreversible eye damage. Wear protective eyewear (goggles, face shield, or safety glasses) and gloves when applying GreenClean Granular. Wash hands after use.

Apply GreenClean Granular to any listed water and surface sites.

CONTAINERIZED WATER SURFACES (with no outflow to the natural environment)

WATER TREATMENT

Use GreenClean Granular to treat, control, and prevent a broad spectrum of planktonic and filamentous blue-green algae. Effects of treatment are immediately apparent (bubbling, bleaching/discoloration of algae, floating of dead organic matter). Waters treated with GreenClean Granular are permissible to be used without interruption.

ALL DETAILS ON WATER TREATMENT

Measure length (L), width (W), and average depth (D) in feet (ft) or meters (m) and calculate volume using one of the following formulas:

- **Elliptical:**
  \[ \text{Volume} = \left( \frac{\text{Avg. Length} \times \text{Avg. Width}}{2} \right) \times \text{Avg. Depth} \times \pi \]

- **Rectangular:**
  \[ \text{Volume} = \text{Length} \times \text{Width} \times \text{Depth} \]

- **Circular:**
  \[ \text{Volume} = \pi \times \left( \frac{\text{Diameter}}{2} \right)^2 \times \text{Depth} \]

**Rates for Treating String Algae**

Application Instructions for Treating String Algae on Ornamental Waterfalls & Streams:

Step 1: Check pH levels before applying GreenClean Granular. GreenClean Granular can raise pH levels up to 1 unit.

Step 2: Apply early in the morning.

Step 3: Turn off circulation.

Step 4: Apply GreenClean Granular to affected areas - including waterfalls and streams.

Step 5: Turn circulation back on after 10-20 minutes.

**Note:** 1 Lb of GreenClean Granular by weight = 2 Cups in volume

**Rates for Treating Green Water Algae**

Application Instructions for Treating Green Water Algae:

Step 1: Check pH levels before applying GreenClean Granular. GreenClean Granular can raise pH levels up to 1 unit.

Step 2: Apply early in the morning.

Step 3: Shock with GreenClean Granular at the high curative rate.

Step 4: Treat as needed once per week with GreenClean Granular at the low curative rate in conjunction with water conditioners (such as beneficial bacteria).

**Note:** 1 Lb of GreenClean Granular by weight = 2 Cups in volume

GENERAL TREATMENT NOTES
• Treat only a half or a third of any large body of water at a time.
• Control is most easily achieved when algae are not yet well established. Treat when growth first begins to appear.
• Diverse, thick mats of algae throughout the water volume are indicative of heavy algae growth.
• Apply early in the morning under sunny conditions, and when water temperatures are warm. Sunlight and higher temperatures both enhance GreenClean Granular activity; GreenClean Granular will work more slowly in colder water.
• Skim any dead algae and organic matter that rises to the water’s surface after treatment. Allowing dead organics to sink and decay will provide a food source and additional nutrients that stimulate algae re-growth and further blooms.
• If using in conjunction with other water additives (such as bacteria or enzymes), always apply GreenClean Granular first and wait several hours before adding any other products.
• Retreat areas if re-growth begins to appear. Allow 48 hours between consecutive treatments.
• Re-treat areas if re-growth begins to appear. Allow 48 hours between consecutive treatments.
• Maintain ponds with GreenClean Granular at a frequency appropriate for your environmental conditions.
• After application, do not allow undiluted granules to remain in an area where humans or animals are exposed. Sweep up or remove undiluted granules. Undiluted granules may also be eliminated by thoroughly hosing down with water.
• Non-target plants will suffer contact burn if undiluted granules are accidentally spilled on them. Do not apply in such a way that the concentrated product comes in contact with flowering plants.
• Never apply at higher than the application rates indicated under the Directions for Use, as desirable plants could be potentially harmed.
• Do not tank mix with aquatic herbicides or algaecides containing copper or bromides. Always apply GreenClean Granular at least one day prior to the application of these products.

EFFECTIVENESS FACTORS
• Effects of GreenClean Granular treatment are immediately apparent (bubbling, bleaching/discoloration of algae, floating dead organic matter).
• GreenClean Granular treatments are successful when contact of the pesticide is made with the algae.
• Liquid applications will not sink through the water column as readily as a granular application.
• When treating surface mats and blooms, it is possible that GreenClean Granular will not penetrate the water column below the infested area, and a second application is then required for treating any bottom growing algae.
• Apply more often during the summer months when water consumption and temperatures are high.

APPLICATION METHODS
SPREADING / BROADCASTING: Broadcast GreenClean Granular with a mechanical spreader or by gloved hand, directly on the water surface, from shore or from a properly equipped boat. A hand spreader or any other applicator that will insure uniform coverage is acceptable.

SPOT TREATMENT: Apply GreenClean Granular directly over the infected area. Re-treatment is required when heavy growth occurs.

Application Instructions for Pond Cleaning:
Step 1: Drain pond (remove fish & plants)
Step 2: Apply GreenClean Granular to all surfaces
Step 3: Rinse with water after 10-20 minutes
Step 4: Drain pond
Step 5: Re-fill pond (replace fish & plants after de-chlorinating)
