

YELLOW JACKET And WASP LURE

NEW IMPROVED LURE DESIGN

****NEW IMPROVED JAR – CONTAINS NO TUBE****

USE THESE INSTRUCTIONS FOR
“PLASTIC JAR TRAPS”

Remove lure and yellow twist tie from jar. Fill the jar ½ full with apple juice (concentrate okay), pomegranate juice or other non-citrus juice. Add one or two drops of dish soap to the juice. Remove the lid from the lure and discard the lid, then place the lure into the juice. Tie a knot in one end of the twist tie. Slide the other end through the hole in the lid. Screw the lid on the trap and hang trap securely using the twist tie.

Suggestion: Add protein bait such as tuna fish, cat food or hamburger to the juice to increase catches. Every 10-14 days, empty and wash out and repeat the above instructions. Use a new lure each time. Place the trap at least 10 feet from picnic areas or porch. Do not place trap near active nests, as the insects will not stop at the trap on the way to the nest.
